UC Irvine Emergency Management

Dear zotALERT Subscriber,

You are receiving this message because your email is currently registered to receive UC Irvine's zotALERT emergency notifications.

zotALERT is UC Irvine's official emergency notification system. It is used to deliver urgent safety information during campus emergencies, including evacuations, shelter-in-place situations, and active threats. It is not used for routine university communications.

The way non-UCI affiliates register for zotALERT is changing. Previously, a UC Irvine employee or student could register a non-affiliate to receive zotALERTS. Beginning October 9, 2026, non-affiliates need to re-register using the new self-registration process to continue receiving zotALERT emergency alerts.

Re-Register Now

To continue receiving emergency notifications, **text zotALERT to 226787** from the mobile number you want to use to receive zotALERTs notifications.

Re-registering allows you to remain connected to emergency information that may affect people you care about.

Thank you for staying connected to UC Irvine emergency notifications.

Sincerely,

Vanessa Flores

Director

Emergency Management
